HAWAHAN LEGISLATURE-1862. HOUSE OF NOBLES.

JUNE 9 .- Monday no business was transacted JUNE 10 .- Mr. Haalelea, from committee, reported on the bill to amend the law relating to licenses of wholesale liquor dealers, adversely, saying that he considered further legislation on the subject to be un-

Mr. Gregg, associate in the committee, concurred in the report, in expectation that a measure would be brought in hereafter which would accomplish all necessary changes on this subject. Report adopted and bill

laid on table. The bill to reduce the taxes on horses from one dollar to fifty cents, came in from the House of Representatives. On the first reading, Mr. Bishop moved it be

Mr. Ii remarked that he thought the Representatives had passed this bill in deference to the instructions of their constituents, and to secure popularity with them. The bill was unanimously rejected.

The bill to amend the law of 1860, to prevent mar-Justices also jurisdiction, came from the Lower House. Mr. Ii remarked that he thought that a great cause for the necessity of such a law as this, and the frequency of divorces, was the people so poorly understanding the nature of marriage. They married in haste, without familiar acquaintance, to gratify a tran-

better off, they went from the married partner. Mr. Wyllie thought so too. He believed that it would be judicious to use in the marriage ceremony the form of the Episcopal Church, which so fully instructs in the obligations thereby incurred. He thought the brief favorable. method in use was not much better than the old Irish custom of jumping backward over a sword, and calling in kegs 7@7%c; best in mats, 7@7%c; dark 6@7c.

sient desire. When they saw any one else they fancied

Gov. Kekuanaoa would have the penalties increased A deserting husband or wife should be punished by a

heavy fine or some years imprisonment, JUNE 11 .- On the inter-island steamboat bill, the motion was made to refer it to the Minister of the In-

terior as a committee. Mr. Wyllie said he would be in favor of the Government even purchasing the remaining interest in the steamer, and getting the whole control. The Government expended since 1850, \$700,000, on internal improvements, which might now be appraised at \$100,000. What was steam communication but a road, a highway, of the greatest consequence to the country-a private company having the exclusive chartered principles. Referred accordingly.

JUNE 12.- The House of Representatives sent a message notifying that they had appointed a committee to confer upon the bill to reduce the horse tax.

Mr. It said he should be glad to meet that committee, in order to state to them how fixed was the purpose of this House to adhere to its position in this in tter. No reduction could be made in this tax at this time. Hereafter when the revenue of the kingdom should have become large and settled upon the basis of industrial hains, with 10 cds firewood, 100 pumpkins, 100 waterbecome large and settled upon the basis of industrial enterprises, it would be time en ugh to consider the reducing the horse tax.

Mr. Gregg said that while he was of a decided opinion as to making any change in the present law, he thought it due to courtesy to a co-ordinate branch of the Legislature to appoint a committee to meet their

The Prince Kamehameha reported on the steamer bill adversely to any present action upon it.

Upon the motion to lay the bill on the table, Mr. Wyllie spoke with earnestness of the importance to the Islands of steam communication. He thought it an enterprise that it would be well for the Government to undertake on the principle that it was a highway-the most important highway in the kingdom. A private company would not run at a loss, but the Government, although running at a nominal loss of some thousands, in that department, might find a more than n another. He was on principle opposed to Government engaging in banking, or navigation, or commerce, as one naturally would be who was brought up in Great Britain, and not unacquainted with the United States, where all these matters are left to private enterprise; but the peculiar circumstances of a country must be considered. Those countries have a wealthy population. The people of this Kingdom are poor. Thu-, in France railroads are not the property of corporations, but of the Government, which must carry on great public improvements, or fall behind the age. He believed we should never have steam navigation among the islands established except as a Government undertaking, and he was in favor of the Government purchasing the balance of the Kilauea.

Mr. Bishop was gratified at the character of the report. He thought that it was a matter in which we could not proceed with too great caution. He could not agree with Mr. Wyllie's view that the Government should undertake this enterprise, and the sooner it could get out of their present interest the better.

The Prince Kamehameha said the proposed new bill would give another monopoly to W. L. Green, R. C. Janion and their associates. Janion was in England; who or where the associates would be we did not know. What kind of boat or boats they would put on we did not know-nor was it yet declared that the Government intended to withdraw from their interest under the present charter. Report accepted and bill laid on

HOUSE OF REPRESENTATIVES.

JUNE 5 .- The following principal business was transacted by the House. Mr. Manini, from the Military approving of the same. Report adopted.

Several bills were read for the first time, but as their fate is uncertain we will only report those that received a discussion or were finally passed

A Bill providing for deposits in the Treasury passed its third reading.

The Steam Navigation Bill, as amended, was discussed in Committee of the Whole; pending discussion the House adjourned. June 6 .- The Steam Navigation Bill was again discassed in Committee of the Whole, and passed its se-

cond reading. JUNE 7 .- The Steam Navigation Bill passed the third

reading. Several Bills read first time and ordered for discussion in the House.

A Bill to reduce the tax on horses to fifty cents per head, was read second time and discussed in Committee of the Whole The Bill passed.

June 10 .- Mr. Rhodes, from Committee Internal

Improvements, reported a Bill relating to the Post-Office Department ; read first time and referred.

A Bill relative to the c llection of debts was read third time and passed.

House in Committee of the Whole discussed the Appropriation Bill. Pending discussion adjourned.

CORRESPONDENCE.

Mr. EDITOR-Sir : This Government is thought to unite the two elements-monarchical and republicanbut it app are also to indicate one element unknown to either, that of a regular periodical earthquake, whose vibrations threaten biennially, after two years internal rumbles, its interior framework of offices, whose incumbents are made to feel something like a tolerated class, in a constant rotation of trial before new judges. In other countries, heads of departments are allowed to be trustworthy judges of the value of services, character and qualifications, and the only judges of the work required, through familiarity of details; and instead of recognizing the low idea of cheap bids, they allow the chosen employee to retain some respect for

himself, as giving value for value. If the amounts of Clerk's salaries were open to debate under foreign governments, what would be the competitor, through an influential leader, would offer delies, bxs..... their services at salaries which would immediately vacate the offices or starve the retainers; and after supplanting those who resign, begin to prepare petitions

14 for increase of salary-having found out the onerous duties of the office. It may have been necessary here to adopt the present rule in the incipiency of this Government, but surely it is now an excrescence calling

for excision for the health of the body politic. Some offices of light work and large pay are open to reasonable reductions, and many probably to extinc-tion, as supernumerary; all of which should be brought about by the knowledge and experience of the heads of those departments, as the result of honest and impartial inquiry and investigation, without the levelling agency of unceremonious coercion descending to the humble salary of the lowest servant. Surely the proprieties in these arrangements must have found their true level, or very near it, before this.

QUARTERNITY.

COMMERCIAL.

By the arrival of the bark Speedwell yesterday, 14 days from San Francisco, we have dates from that port of the 28th ult. The Olpper ship Phantom, en route for Hongkong, was to sail in a few days after the Comet and may bring another mail. The brig Joshphine arrived over on the 26th ult., 16 days from

We observe no change in Island produce, except Pulu, which is still lower, and could scarcely be quoted at any price, as the market was greatly overstocked. In Dry Goods we notice some little advance; standard Drills by the 100 bales, from 131@14jc; in Burlaps, 100,000 yds @14c. In Rice a downward tendency in prices continue. In Tobacco, sales of fancy brands 60 to 75c.

We notice that the bill for a line of steamers between San Francisco and China, to ply monthly, touching at these Islands, has been strongly urged by Mr. Latham, and others of the California delegation, and we believe has passed the Senate.

We also notice by the New York correspondence of the San Francisco Bulletin, that three New Bedford whaleships have been ried people deserting each other, by giving District purchased by a Bremen firm, which is said to have a branch house in this place. Two of the vessels are the Oregon and Cambria, both of which are to take cargoes of petroleum oil to Bremen, and to be engaged afterwards in the whaling business. In Domestic Produce we have but few transactions to note. The Fankee sails to-morrow, taking a full freight of sagar,

molasses and pulu. The weather for the coasting trade is very favorable, and produce comes forward quite treely. About a month more of good

weather will see the bulk of the sugar crop in market. We are pleased to learn that the Coffee crop in Kona looks

SUGAR -Best grades No. I in kegs held at 8c; second quality

COFFEE-Small sales for local trade at 20c. MOLASSES-No sales; shipments made on plantation acc't.

PULU-Shipment on producer's acc't. PADDY-Some little coming forward. The market for this article cannot be considered settled, and will be guided more by

MEMORANDA.

The sloop Louisa, Capt Bent, sailed hence March 28, and arrived at Palmyra Island on the 6th April, having had pleasan, weather on the passage down, with moderate winds from the southward of East. Left again May 17 and touched at Washington Island on the 24th, having had light westerly winds between Committee, recommended an appropriation of \$43,- ton Island on the 24th, having had light westerly winds between 537 95 for the War Department. Mr. Rhodes, from the two. The first eight days from Washington Island had light Committee on Internal Improvements, reported upon | northerly winds, with frequent rain squalls; and then had the the lease and contract respecting the Government Press, wind from NE to NNE to within 200 miles of port. Was 10 days from lat 4 49 N to 10 N. Capt Bent wishes particularly to call attention to the fact, that in long 158° to 160° W, and lat 4° to 9° N, he found a westerly current of 20 knots in 24 hours .-He has been over the same locality every few months during the last five years, but always found an easterly current. During this last crossing he was almost entirely becalmed the greater portion of the time, and the rain was much heavier than he ever before experienced. A tub 16 inches deep, left standing on the deck was completely filled four times during one watch.

On Sunday last a clipper ship, with all sail set, passed our port at a distance of from 19 to 15 miles. This was in all probability the Washington, from San Francisco, bound to Hongkong. An effort was made to communicate with her, but without effect. New Sloop .- The Emily, a new sloop of about 21 tons, arrived on Tuesday last from Molokai, where she was built by her present owner and master, Capt Wright. She is intended for the trade between that island and this port, and appears to be a very staunch and neat little craft. Her dimensions are as follows: -length of keel 30 ft., length over all 38 ft., beam 14 ft. depth of hold 4 ft. 10 in. May she have success
